Chess Project – Meeting Minutes #1

Date: October 29, 2026 at 9 PM
Next Meeting: Saturday, October 31, 2026 at 8 PM

1. Research Questions

- The professor emphasized the importance of developing interesting and meaningful research questions.
- Our team is expected to identify **at least three research questions** related to our chess AI project.

2. Proposed Research Questions

We discussed two potential research questions comparing **Minimax and Monte Carlo Tree Search (MCTS)**:

1. **Execution Time:** How do Minimax and MCTS compare in terms of execution time when analyzing chess positions?
2. **Move Accuracy:** Which algorithm is more effective at identifying the correct or optimal move in a given chess position?

3. Next Steps

- Develop a third interesting research question.
- Further refine the two proposed research questions.
- Continue discussing the research questions and finalize our direction during the **next meeting on Saturday, October 31, 2026**.
